| WORK INSTRUCTIONS FOR CHEMICAL MANAGEMENT | | |

1. Chemicals are stored separately in cabinets according to their respective properties.
2. Flammable and explosive chemicals are stored in non-combustible cabinets (made of iron).
3. Chemicals are arranged based on their properties.
4. Acidic and basic chemicals are placed on lower shelves.
5. Large-sized bottles are stored on the bottom shelf.
6. Avoid handling chemicals with fingers. When conducting experiments, maintain a distance of at least 1 foot from the specimen. Do not smell or taste chemicals.
7. Check the label on chemical bottles before moving them. Take only the amount of chemicals needed for the experiment.
8. Never return unused chemicals to their original containers.
9. Do not use empty food or beverage containers to store chemicals as they may produce unintended effects or reactions.
10. Use baskets or buckets to carry or move chemicals in large bottles, do not carry by hand, to avoid the risk of falling or breaking.
11. Do not move chemicals or other materials out of the laboratory area.
